

JORIS D.C. ALKEMA

Cloud / Platform / MLOps Engineer

Netherlands | Open to relocate within Europe
JorisDCalkema@gmail.com | +31 6 8168 3476

MSc Computer Science graduate and part-time MLOps/Cloud Engineer experienced in Kubernetes, AWS EKS, GitOps, CI/CD and ML inference infrastructure. Incoming Pre-PhD Researcher at Leiden University, with first-author work on efficient network anonymization. Interested in cloud/platform engineering, AI infrastructure and applied R&D.

TECHNICAL SKILLS

Cloud & Infrastructure:	AWS EKS, DigitalOcean Kubernetes, on-prem Kubernetes, MicroK8s, Linux, Microsoft 365
Kubernetes & DevOps:	FluxCD, GitOps repositories, Kubernetes YAML, Helm/Kustomize patterns, Ansible, GitLab CI/CD, Nexus, Docker
MLOps & Software:	Triton Inference Server, ML inference APIs, model repository setup, C++, Python, Java, Bash
Security:	ISO/IEC 27001 implementation support, Keycloak access control/SSO, backups, asset inventory, evidence documentation

EXPERIENCE

Incoming Pre-PhD Researcher (POPNET)

Starting Oct 2026 | 24 hrs/week

Network Science Group, Leiden University

- Will contribute under Prof. Frank Takes to privacy-conscious infrastructure and methods for analyzing population-scale social networks.

MLOps / Cloud Engineer - Braincreators, Amsterdam

Apr 2025 - Present | 12 hrs/week

- Support Kubernetes infrastructure across AWS EKS, DigitalOcean and on-premise clusters, mainly in dev/staging with increasing production involvement.
- Maintain FluxCD GitOps repositories and Kubernetes manifests for reproducible deployments; expand infrastructure automation with Ansible.
- Build GitLab CI/CD workflows for ML artifacts and deployment automation using Sonatype Nexus.
- Deploy and troubleshoot ML inference APIs, including Triton Inference Server model repository setup.
- Contribute to ISO/IEC 27001 implementation through backups, Keycloak access control/SSO, asset inventory and evidence/documentation support.

System Administrator - Roodhals Capital, The Hague

Sep 2022 - Sep 2026 | 6-12 hrs/week

- Supported Microsoft 365, user systems, hardware and internal infrastructure in financial services.
- Built financial-data scraping and Excel export workflows; supported AI tooling and internal automation.

PUBLICATIONS

J.D.C. Alkema, R.G. de Jong, K.F.D. Rietveld and F.W. Takes. *Fast and Effective Search for Budgeted Network Anonymization*. International Conference on Complex Networks and Their Applications (COMPLEX NETWORKS 2026). **Accepted; forthcoming.**

EDUCATION

MSc Computer Science - Leiden University, Advanced Computing and Systems

2024 - 2026

Average grade: 8.25 | Thesis grade: 9.0

- Thesis: *Fast and Effective Search for Budgeted Network Anonymization*. Developed C++ algorithms; the resulting paper reports a $1,891\times$ geometric-mean speed-up over the original greedy baseline across 17 networks.
- Relevant coursework: Cloud, Distributed & High-Performance Computing; System & Software Security; Advanced Data Mining; Social Network Analysis.

BSc Data Science & Artificial Intelligence - Leiden University

2021 - 2024

Average grade: 7.4 | Thesis grade: 7.5 | 21 additional EC

- Thesis: robustness of neural networks under fault-injection attacks, comparing simulation and physical measurements using ChipWhisperer.
- Selected project: fine-tuned LLM for requirements engineering; project acquired by the client.

Community volunteering: running club event meal preparation, logistics and promotional support.
